Argumentation

Arguments

- ⚴ Proofs offered to support claims
- ⚴ must back up with good reasoning and evidence

ARE

Assertion (statement)
- ⚴ begins argument
- ⚴ claim something is true without providing reason or evidence

Reasoning (because)
- ⚴ supports each assertion
- ⚴ provides explanation why audience should believe claim
- ⚴ linked to assertion

Evidence
- ⚴ completes argument
- ⚴ backs up statement and reasoning
  1. example or illustration
  2. form an analogy-true in one situation will be true in similar one
  3. statistical data-survey or poll
